EXPERIENCE

- ElasticRun** Pune, India
Associate Software Engineer July, 2022 - Jan, 2023
 - Tech-Stack:** Python, Javascript, Typescript, Dart, Frappe, Flutter, Angular, Jenkins, Ansible, MongoDB, Docker, AWS, HTML/CSS
 - System Algorithm Design:** Conceptualized and implemented algorithms and modules tailored to meet project managers' and stakeholders' requirements.
 - Angular to Flutter Migration:** Led the successful migration of a TypeScript codebase, originally built on the Angular framework, to a Dart codebase utilizing the Flutter framework. Acquired hands-on experience with Flutter during the migration process.
 - Mentorship:** Mentored new interns, aiding in their acclimatization to legacy projects equipping them with skills for high-level contributions to the organization's growth and development.
 - Code Optimization:** Optimized code for legacy modules, systematically addressing and resolving bugs to enhance overall code performance.
- ElasticRun** Pune, India
Intern Jan, 2022 - July, 2022
 - Tech-Stack:** Python, Javascript, Typescript, Frappe, Angular, TensorFlow, D3.js, Jenkins, Ansible, MongoDB, Docker, AWS, HTML/CSS
 - In-House Project Development:** Managed cross-functional teams to launch in-house project applications, achieving efficiency, user satisfaction, and on-time completion. Demonstrated effective teamwork and stakeholder communication for successful project delivery.
 - Optimized Development:** Developed a personalized cloud-container dev-environment for the dev team, increasing the development speed and efficiency by 18-22%.

SKILLS SUMMARY

- Languages:** C, C++, Dart, JavaScript, Python, SQL, Typescript, Unix scripting
- Frameworks:** Angular, Django, Flask, Flutter, Frappe, React
- DevOps & tools:** AWS, Azure, Clang, Docker, Jenkins, GCP, GIT, JIRA, Kubernetes, LLVM, Postgres
- Coding Profiles:** [Codechef](#), [Codeforces](#), [Github](#), [Leetcode](#)

PROJECTS

- Comprehensive Augmented Reality (AR) Dictionary** Source Code:
 - Tech Stack:** C#, Unity Engine, ARCore, Google Custom Search API, Tesseract, OpenCV, NLTK
 - Engineered an AR dictionary ecosystem with real-time word analysis and a custom search engine, leveraging machine learning algorithms.
 - Seamlessly integrated ARCore for enhanced user experience and optimized performance, showcasing expertise in ML and AR technology.
- Review-Categorizer** Source Code:
 - Tech Stack:** Python, Scikit-learn, TensorFlow, PyTorch, NLTK
 - Created a powerful Natural Language Processing model utilizing machine learning for precise classification of e-commerce reviews as either positive or negative, enhancing product-consumer interactions.
- ETL-Batch-Processing** Source Code:
 - Tech Stack:** Apache (Hadoop, Spark, Sqoop, Kafka, Ranger, Flink, HBase, Ambari), Tableau, Python, AWS EMR
 - Led Big Data-Hadoop adoption, replacing RDBMS, streamlining migration, and enabling advanced analytics with ML.
 - Demonstrates adeptness in leveraging cutting-edge tech to solve complex business problems.

EDUCATION

- Vishwakarma Institute of Technology** Pune, India
Bachelors in Technology; CGPA: 7.98 Aug, 2018 - July, 2022
Courses: Operating Systems, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Probability and Statistics and Network Security.

CERTIFICATIONS AND ACHIEVEMENTS

- Selected as a Contributor for MariaDB in the Google Summer of Code 2023 Program to integrate [Fuzzing Pipeline into the MariaDB ColumnStore](#) Engine over a period of six months.
- Joined [The-Algorithms](#) Initiative in July 2021 and took on the responsibility of maintaining the website and the C++ codebase by becoming maintainer of website repository.
- [Click here](#) for all the important certifications, feel free to go over my [Linkedin's "Licenses & certifications"](#) section for more.
