EXPERIENCE

- ElasticRun** Pune, India
Associate Software Engineer July, 2022 - Jan, 2023
 - System-Specific Algorithm Design:** Designed and implemented custom algorithms using CLI frameworks to seamlessly integrate with in-house frameworks and web interfaces, optimizing system performance and enhancing user experience.
 - Angular to Flutter Migration:** Led the migration from Angular to Flutter, ensuring a smooth transition with minimal user disruption and maximum efficiency gains by applying software development principles and industry best practices.
 - Intern Supervision:** Offered expert mentorship and support to newly recruited interns, guiding them through complex legacy projects, and equipping them with skills for high-level contributions to the organization's growth and development.
- ElasticRun** Pune, India
Intern Jan, 2022 - July, 2022
 - Business Functionality Enhancement:** Successfully spearheaded optimization of over 20 business functionalities, enhancing system performance through rigorous unit testing for high-quality deliverables and adherence to project timelines.
 - In-House Project Development:** Led cross-functional teams in successfully launching multiple in-house project applications, ensuring maximum efficiency, user satisfaction, and timely completion through strong teamwork and effective stakeholder communication.
 - Personalized Dev-Environment Creation:** Developed a personalized cloud-container dev-environment, boosting development speed and efficiency by 18-22%. Streamlined workflows and enhanced team productivity, earning recognition from team members and management.

SKILLS SUMMARY

- Languages:** C, C++, C#, Dart, JavaScript, Python, SQL, Typescript, Unix scripting
- Frameworks:** .NET, AngularJS, Django, Flask, Flutter, Frappe, React
- Tools:** AWS, Azure, Clang, Docker, Jenkins, GCP, GIT, JIRA, Kubernetes, LLVM, Postgres
- Coding Profiles:** [Codechef](#), [Codeforces](#), [Github](#), [Leetcode](#)

EDUCATION

- Vishwakarma Institute of Technology** Pune, India
Bachelors in Technology; CGPA: 7.98 Aug, 2018 - July, 2022
Courses: Operating Systems, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Probability and Statistics and Network Security.
- Nirala Vidyalaya Jr. College** Nagpur, India
Higher School Certification; CGPA: 6.60 (Honors in Computer Science) Aug, 2016 - May, 2018
- Bishop Cotton High School** Nagpur, India
Secondary School Certification; CGPA: 6.94

PROJECTS

- Fuzzing pipeline for MariaDB ColumnStore Engine (GSoC '23):** Developed a powerful fuzzing infrastructure by integrating libFuzzer, MSAN, ASAN and various sanitizers. Detected and diagnosed bugs, including memory corruption and security vulnerabilities, to enhance software quality and security. Improved testing efficiency and reliability under realistic workloads (corpus), making a significant contribution to MCS. **(May '23)**
- VR Classroom:** Worked as a Front-end developer at VR-Classroom, utilizing advanced JavaScript frameworks like GASP and NextJS for immersive hologram-based education. Redefining home schooling with futuristic VR technology and distraction-free learning. **(Feb '23)**
- Comprehensive Augmented Reality (AR) Dictionary:** Developed an AR dictionary ecosystem with real-time word analysis and custom search engine results using machine learning algorithms. Seamlessly integrated with ARcore for an immersive user experience and optimized performance, showcasing expertise in ML and AR technology. **(Mar '21)**
- Review-Categorizer:** Developed a potent NLP CLI tool to classify e-commerce reviews (e.g., Alibaba, Amazon, eBay, Flipkart) as constructive or destructive, improving product-consumer relationships with ML-driven analysis. **(Sep '20)**
- ETL-Batch-Processing:** Led Big Data-Hadoop adoption, replacing RDBMS, streamlining migration, and enabling advanced analytics with ML and AI. Demonstrates adeptness in leveraging cutting-edge tech to solve complex business problems. **(Feb '20)**

CERTIFICATIONS AND ACHIEVEMENTS

- Selected as a Contributor for MariaDB in the Google Summer of Code 2023 Program to integrate [Fuzzing Pipeline into the MariaDB ColumnStore](#) Engine over a period of four months.
- Joined [The-Algorithms](#) Initiative in July 2021 and took on the responsibility of maintaining the website and the C++ codebase by becoming maintainer of website repository.
- [Click here](#) for all the important certifications, feel free to my [Linkedin's "Licenses & certifications"](#) section for more.
