EXPERIENCE

- ElasticRun** Pune, India
Associate Software Engineer July, 2022 - Jan, 2023
 - System-Specific Algorithm Design:** Leveraged expertise in CLI frameworks to design and implement custom algorithms that seamlessly integrated with various in-house frameworks and web interfaces, optimizing the organization's ecosystem for improved system performance and enhanced user experience.
 - Angular to Flutter Migration:** Collaborated closely with the Team Lead to upgrade an in-house project from Angular to Flutter, leveraging a deep understanding of software development principles and industry best practices to ensure a seamless transition with minimal user disruption and maximum efficiency gains.
 - Intern Supervision and Legacy Project Support:** Provided expert mentorship and support to newly recruited interns, guiding them through complex legacy projects and equipping them with the skills and knowledge needed to contribute to the organization's growth and development at a high level.
- ElasticRun** Pune, India
Intern Jan, 2022 - July, 2022
 - Business Functionality Enhancement:** Spearheaded the successful completion of over 20 requirements to optimize business functionalities and enhance system performance. Conducted rigorous unit testing to ensure high-quality deliverables and adherence to project timelines.
 - In-House Project Development:** Collaborated with cross-functional teams to successfully launch multiple in-house project applications, leveraging strong teamwork skills and a deep understanding of software development principles to ensure maximum efficiency and user satisfaction. Maintained close communication with stakeholders to ensure project alignment and timely completion.
 - Personalized Dev-Environment Creation:** Designed and developed a personalized cloud-container as a dev-environment, resulting in an impressive 18-22% increase in application development speed and efficiency. Streamlined workflows and enhanced team productivity, earning recognition from team members and management.

SKILLS SUMMARY

- Languages:** C, C++, C#, Dart, JavaScript, SQL, Typescript, Unix scripting
- Frameworks:** .NET, AngularJS, Django, Flask, Flutter, Frappe, React
- Tools:** AWS, Azure, Docker, Jenkins, GCP, GIT, JIRA, Kubernetes, Postgres
- Coding Profiles:** [Codechef](#), [Codeforces](#), [Github](#), [Leetcode](#)

EDUCATION

- Vishwakarma Institute of Technology** Pune, India
Bachelors in Technology; CGPA: 7.98 Aug, 2018 - July, 2022
Courses: Operating Systems, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Probability and Statistics and Network Security.
- Nirala Vidyalaya Jr. College** Nagpur, India
Higher Secondary Course; CGPA: 6.6 (Honors in Computer Science) Aug, 2016 - May, 2018

ACADEMIC PROJECTS

- Comprehensive Augmented Reality (AR) Dictionary:** Spearheaded the development of a cutting-edge AR dictionary ecosystem utilizing machine learning algorithms for real-time word analysis and custom search engine results. The AR interface was seamlessly integrated with ARcore, delivering an immersive experience for users. The system was optimized for maximum speed and precision, setting new standards for AR dictionary functionality and usability. This project showcases my expertise in machine learning and AR technology, providing a valuable addition to my skillset. **(Mar '21)**
- Review-Categorizer:** Developed a powerful Natural Language Processing CLI tool to classify product reviews from major e-commerce websites such as Alibaba, Amazon, eBay, and Flipkart as constructive or destructive, improving product-consumer relationships. My machine learning expertise was used to train an NLP model that automates the process of gathering real-time reviews and generating responses in a dataframe by comparing them against word clouds. This project demonstrates my ability to use NLP and machine learning algorithms to deliver results that can have a significant impact on business outcomes. **(Sep '20)**
- ETL-Batch-Processing:** Led the adoption of the Big Data-Hadoop platform, replacing traditional RDBMS and appliances and revolutionizing the analytics landscape. The migration process was streamlined, and data integration was simplified by categorizing and transforming multiple data formats into a common format. By leveraging my expertise in machine learning algorithms and artificial intelligence, data was added to data analysis tools to identify key trends and insights. This project highlights my ability to effectively use cutting-edge technologies to solve complex business problems. **(Feb '20)**

CERTIFICATIONS AND AWARDS

- [Applied Cryptography](#), Specialization, University of Colorado.
- [DevOps on AWS](#), Specialization, Amazon Web Services (AWS).
- [Google IT Automation with Python](#), Professional Certificate, Google.
- [Algorithms design paradigms](#), Specialization, Stanford (Online).
- [Architecting with Google Compute Engine](#), Specialization, Google.
- [DeepLearning.AI TensorFlow Developer](#), Professional Certificate, Deep Learning.AI.
- [Advanced Machine Learning on Google Cloud](#), Specialization, Google.
- [AWS Fundamentals](#), Specialization, Amazon Web Services (AWS).
- [Google IT Support](#), Professional Certificate, Google.
